Confidence lower on global news

- ANZ-Roy Morgan Australian Consumer Confidence fell 2.3% last week, closing below the long-term average.
- The fall was driven by weakness in economic conditions, with current falling 3.8% and future losing a massive 7.9%. Both the economic sub-indices are below their respective long-term average.
- In contrast, the measures relating to personal finances rose modestly. Current finances were up by 0.2% for the week, while future finances gained 0.6%.
- The 'Time to buy a major household item' index fell 1.4% - its third consecutive decline. The four-week moving average for inflation expectations fell by 0.1ppt to 3.9%. Weekly readings of inflation expectations have shown signs of weakness over the last few weeks.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last week (17-18 Aug)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
112.8	-2.3%	115.7	113.1	3.9%

Data collected last weekend (Saturday and Sunday), based on around 1,000 face-to-face interviews. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

"Australian households appear to be troubled by negative global economic developments and the related equity market weakness, with sentiment toward current and future economic conditions down sharply. Views about current economic conditions have fallen materially for three weeks in a row, while those for future economic conditions are at their weakest since October/November last year. The relative buoyancy of sentiment about personal financial conditions indicates that the tax cuts and lower interest rates are having a positive impact on households. But this hasn't been sufficient to offset the global news flow. The more negative view on the economic outlook is impacting inflation expectations. The past three weeks have seen weekly readings of less than 4%."

Confidence down by 2.3%
