This is the last survey for 2019. We wish you a safe holiday season and look forward to connecting again on Tuesday 7 January.

## Confidence drops after two weeks of gains

- Confidence fell 0.9% last week, primarily due to the 6.4% fall seen in the 'Time to buy a major household item' sub-index.
- Financial conditions were mixed with 'current finances' down by 1.5%, while 'future financial conditions' gained 3.7%.
- Economic conditions were also mixed. 'Current economic conditions' rose 1.6%, while 'future economic conditions' were down 1.2%.
- The four-week moving average of 'inflation expectations' was up 0.1ppt to 4.0%.

## ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (14-15 Dec)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (4-week ma)
108.0	-0.9%	108.0	113.1	4.0%

Data collected last weekend (Saturday and Sunday), based on around 1,000 face-to-face interviews. Not seasonally adjusted. Further data history on page 6.

## ANZ Head of Australian Economics, David Plank, commented:

Momentum fizzled out this week after two successive weekly gains. A delayed response to the soft GDP result and weak retail sales may be at work, as well as the news flow around the bush fires and associated smoke haze. The weakness seen in the 'time to buy a household item' sub-index was almost enough to take it to its lowest level since the global financial crisis. It seems the turn in the housing market has not yet flowed through to sentiment around household items. We note that consumer confidence is not the be all for financial conditions. The [financial wellbeing](#) of Australians is holding up better.

## Confidence lost 0.9 %
