Record bounce from historic low

- Confidence posted a jump of 10.1% last week, the biggest gain since the survey shifted to a weekly basis in 2008. All the subcomponent rose, with the exception of a small decline in 'future economic conditions.'
- 'Current economic conditions' was up by a massive 24.6%. Despite this gain, this subcomponent is still 50% below its level six weeks back.
- 'Current financial conditions' gained 8.8%, while future financial conditions rose 11.4%.
- 'Time to buy a major household item' gained 17.5% compared to a drop of 23.8% previously. The four-week moving average for 'inflation expectations' was stable at 4.1%. The weekly reading dipped to 4.1% from 4.3%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (4-5 Apr)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
71.9	10.1%	77.4	113	4.1%

This weekly ANZ-Roy Morgan Consumer Confidence Rating is based on 1,491 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

The 10.1% jump in confidence recorded in this survey was the biggest since it became a weekly survey in 2008. We think it represents a strong endorsement of the Government's massive wage subsidy package, announced on 30 March. Better news about the flattening of the 'pandemic curve' may also have contributed. The bounce needs to be kept in perspective – confidence is still around the lows seen in 1990 during the last recession. So consumers can hardly be said to be cheerful or ready to spend. But it is nice to be commenting on some better news.

Confidence bounces back from its record low
