Confidence gain loses momentum

- Confidence has strengthened for the fourth week running, though the gain of 1% was much smaller than over the prior three weeks. Reflecting this loss of momentum, the performance of the sub-indices was mixed.
- 'Current finances' gained 0.4%, while 'future finances' fell 3.3%, the first decline after four straight weekly gains.
- 'Current economic conditions' strengthened by 13% for its fourth straight weekly gain, while 'future economic conditions' declined 5.9%.
- 'Time to buy a major household item' also saw its fourth straight weekly gain, up 8.2%, while the four-week moving average for 'inflation expectations' fell 0.1ppt to its lowest ever level of 3.7%, even though the weekly reading lifted to 3.6%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (25–26 Apr)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
85	1%	79.8	112.9	3.7%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,591 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

Confidence is showing signs of consolidation after the strong gains of the prior three weeks. It remains well below average, however, as do all of the sub-components. We are at an important stage in Australia's response to the pandemic, with a number of states relaxing some restrictions. If successful, that could set the stage for a further gain in consumer sentiment. Unfortunately, confidence is likely to be challenged by the publication of some very negative economic data over the coming month, after a period in which the data has not caught up with the severity of the economic impact from the lockdowns.

Confidence gains 1%
