## Year-end cheer

- Consumer confidence continued to scale 2020 highs. The overall index rose 1.7%, matching the prior week’s gain, with most of the subindices registering improvement.
- ‘Current financial conditions’ surged 6.4%, while ‘future financial conditions’ grew 0.5%.
- ‘Current economic conditions’ improved by 2.9%, while ‘future economic conditions’ was unchanged from the previous week.
- ‘Time to buy a major household item’ inched up 0.3%. The four-week moving average of ‘inflation expectations’ rose to 3.6%, though weekly inflation expectations softened to 3.6% from 3.8% the week prior.

## ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (12-13 Dec)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
111.2	1.7%	108.1	112.6	3.6%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,529 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

## ANZ Head of Australian Economics, David Plank, commented:

It was yet another upbeat result in the latest survey, with consumer confidence reaching new 2020 highs. Most subindices are now back at or even higher than the pre-pandemic level, with the confidence in future economic conditions at an 18-month high. The exception is current financial conditions, for which sentiment is close to 10% lower than mid-March and still below the neutral level of 100 (if only just). Despite this exception, the rise in confidence bodes well for the holiday season. Last week we noted the sharp jump in inflation expectations. These have pulled back a bit in this week’s survey but are still elevated enough to push the 4-week moving average to its highest level since late April. This is still some way below the 4% plus level for expected inflation that was typical prior to the pandemic.

### Confidence up 1.7%
