Confidence up 0.4%

- Confidence gained for the eighth straight week and is up 42% from its low point in March, when fears about the pandemic were at the most extreme.
- Financial conditions indices diverged. 'Current finances' declined 1.8%, while 'future finances' gained 3.2% and is now only a touch below average.
- Economic conditions indices also diverged with 'current economic conditions' gaining 0.3%, while 'future economic conditions' declined 2.4%.
- 'Time to buy a major household item' strengthened further, up 2.5%. The four-week moving average for 'inflation expectations' declined 0.1ppt to 3.3%, a new historic low.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

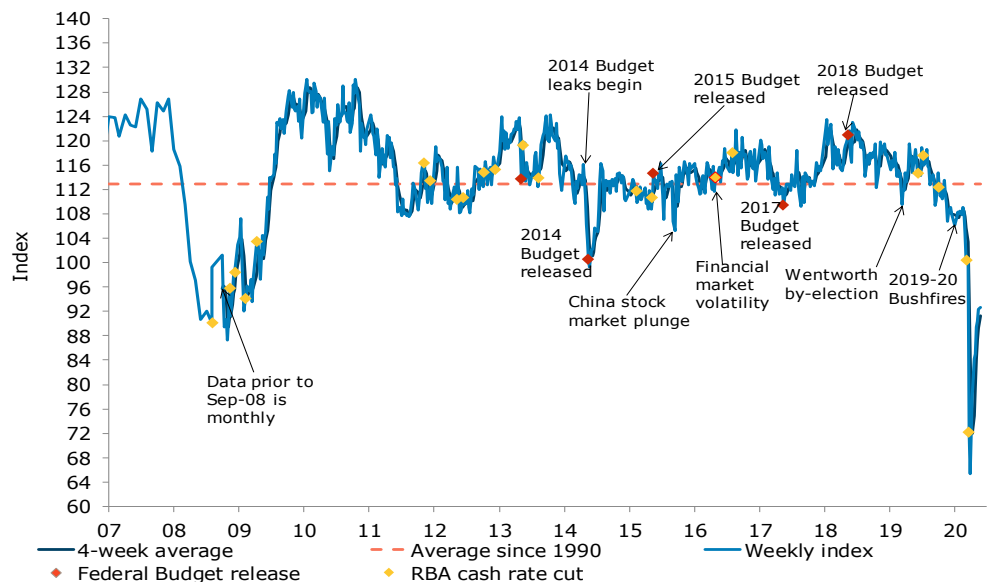

Last weekend (23–24 May)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
92.7	0.4%	91.2	112.9	3.3%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,456 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

Confidence strengthened further last week, albeit modestly. While still below average, sentiment has recovered strongly from its March low and is now only around 15% below its level at the end of February. Government measures and signs that the job market is stabilising seem to be playing a key part in the recovery of the index despite recent concerns over trade with China and weak retail sales. These factors, and the move in Australia's credit rating to a negative outlook by Fitch, may explain why expectations about the 'future economic outlook' fell.

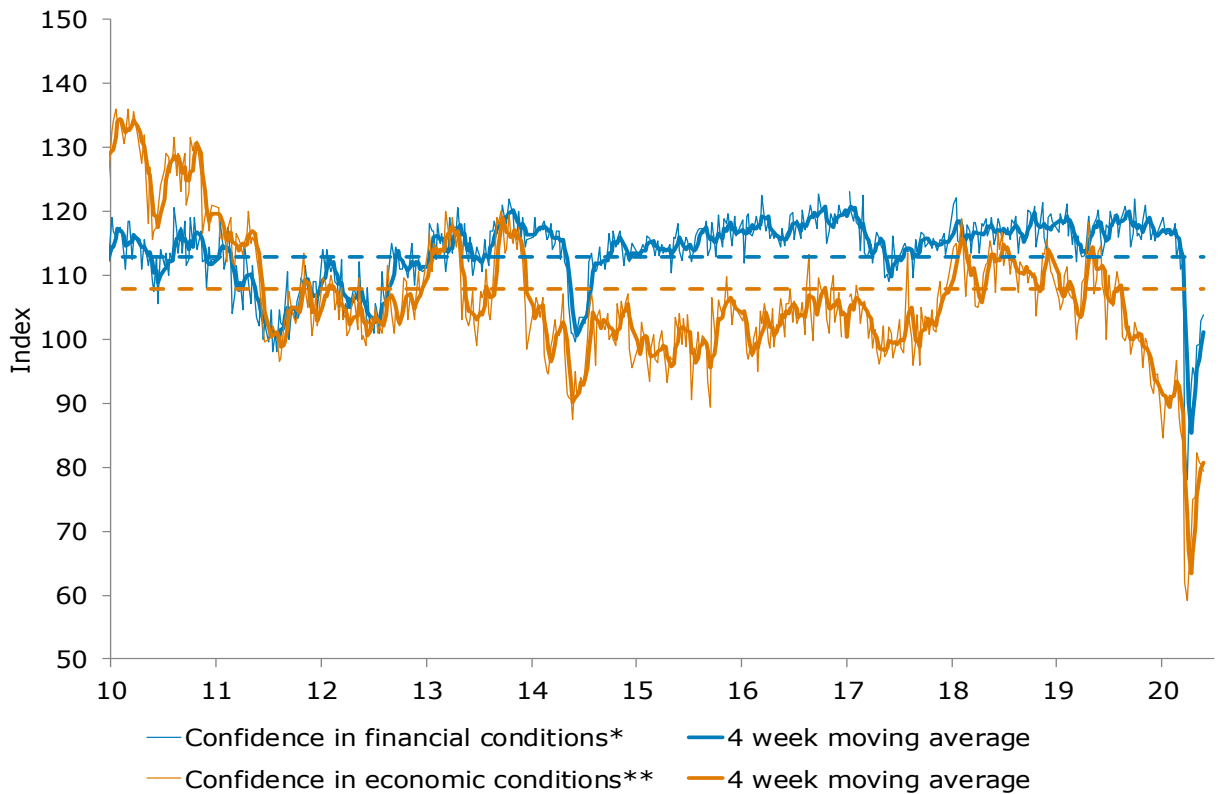

Confidence up a notch
