Confidence drops into pessimistic territory amidst new lockdowns

- Consumer confidence lost 3.1% last week as new snap lockdowns were imposed in south-east Queensland and in Victoria. Critically, confidence dropped below the neutral level of 100 for the first time since the weekend of 31 October/1 November 2020 – just after the end of Victoria's long second lockdown.
- Among the subindices, financial conditions declined, with 'current financial conditions' down 5.7% and 'future financial conditions' losing 4.8%.
- Economic conditions improved after falling for three weeks. 'Current economic conditions' gained 3.8%, while 'future economic conditions' rose 0.9%.
- 'Time to buy a major household item' dropped 8.3%. 'Weekly inflation expectations' rose 0.1ppt to 4.3%, pushing the four-week moving average up 0.1ppt to 4.3%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

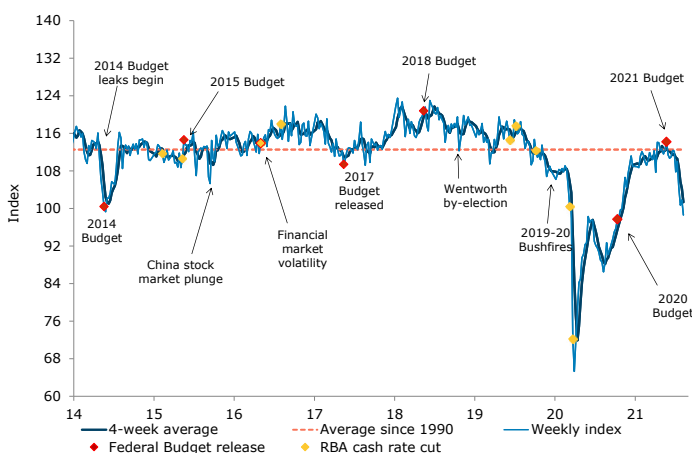

Last weekend (7-8 Aug)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
98.6	-3.1%	101.4	112.5	4.3%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,486 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

Consumer confidence dropped by 3.1% last week as fresh lockdowns were announced in parts of Queensland and Victoria. As a result, confidence dropped by 7.5% in Brisbane and 1.6% in Melbourne. Sydney and the rest of NSW, on the other hand, saw an increase in confidence of 3.7% and 2.1% respectively as the vaccination rate picked up and some restrictions on construction work were eased. Sentiment is still above the level reached during Victoria's long second lockdown, but it is now in pessimistic territory for the first time since early November last year. Our [research](#) suggests we can't be sure the low in confidence in the current cycle has been reached until COVID case numbers start to trend lower.
