ANZ Senior Economist, Felicity Emmett commented:

Consumer confidence declined for a second straight week, driven by concerns about both the economic outlook and household finances. The RBA's 50bp rate hike last week weighed on sentiment, with confidence falling for those people paying off a mortgage by a sharp 5.4%. This continues the trend in place since late April when the high March quarter inflation report brought forward rate hike expectations. Since then, confidence amongst mortgage holders has fallen 25%, while confidence for renters is down just 4%. Inflation expectations lifted as petrol prices hover near record highs. Global oil prices dropped last week, boding well for Australia's retail petrol prices over the coming weeks.
