ANZ Head of Australian Economics, David Plank, commented:

Inflation expectations surged 0.4ppt last week to a multi-year high of 6.4%, even though petrol prices declined slightly. Consumer confidence was essentially unchanged despite this, with a slight decline of just 0.1%. Within the detail, however, sentiment toward ‘current financial conditions’ dropped to its lowest since May 2020. Consumer confidence is very weak given the strength of employment, which we think is directly [linked](#) to concerns over cost-of-living pressures. It will be interesting to see whether the measures expected in the Federal Budget provide a boost to confidence.
