ANZ Head of Australian Economics, David Plank, commented:

The weakness in global financial markets through last week weighed on Australian consumers. A plethora of negative news last week ranging from the UK’s mini-budget to hawkish Fed commentary impacted the AUD, which weakened to its two-year lows. We often see consumer sentiment soften in line with AUD weakness. The jump in inflation expectations, likely linked to the end of the temporary petrol excise cut and uptick in petrol prices, also weighed on sentiment. Consumer confidence will remain fragile as long as market volatility is the dominant theme globally. The RBA’s October rate decision will also impact in the near-term.

Consumer confidence sank by 2.6%
