ANZ Head of Australian Economics, David Plank, commented:

Consumer confidence increased by 0.4% last week, almost reversing the 0.5% decline of the week before. When we look at consumer confidence by housing status the confidence of people paying off their mortgage is greater than those renting for the first time since the RBA started raising interest rates in May after confidence of renters dropped by 8.7% last week. This may indicate that people with mortgages have taken comfort from recent commentary that the RBA might scale back the size of rate increases in October. We think that commentary is misplaced and expect another 50bp from the RBA in October. This might come as something of a shock for those with mortgages. Household inflation expectations jumped 0.3ppt to 5.6%, its highest since mid-August.
