ANZ Senior Economist, Adelaide Timbrell, commented:

Consumer confidence remained below 80 for the eighth week in a row. This streak represents more weeks of confidence being below 80 than over the whole of 2020–22, revealing the effects of ongoing inflation and the adjustment to restrictive monetary policy. All housing cohorts now have confidence below 80 for the first time since mid-March, after the RBA's most recent rate hike. Financial confidence was up a little compared to last week, while economic confidence was down. The 'time to buy a major household item' subindex jumped 5.6pts but remained below 70 for an 11th week.
