ANZ Senior Economist, Adelaide Timbrell, commented:

Consumer confidence remained below 80pts for a fifth consecutive week, the longest time below 80pts since the start of the weekly series in October 2008. Confidence among those paying off their mortgage fell 2.1pts to 70.5 ahead of the April RBA meeting, bringing mortgaged homeowner confidence to 7.2pts below average confidence for all cohorts. Confidence in financial conditions, particularly current financial conditions, is now trending lower than it was during the initial COVID outbreak, as ongoing inflation and the rapid rise in the cash rate bites household budgets. Confidence that 'it is a good time to buy a major household item' declined 1.4pts and was below 70 for an eighth straight week.
