## ANZ Senior Economist, Adelaide Timbrell, commented:

ANZ-Roy Morgan Australian Consumer Confidence rose last week, mostly due to an increase in renter confidence. Among the housing cohorts, confidence jumped 7.9pts for those renting, perhaps due to discourse around rent increases slowing as rate increases slow, or potential rental policy changes. It rose slightly by 0.9pts for those paying off their homes, while it softened 0.7pts for those who own their homes outright. The average confidence level was at its highest since the first week of June but has now stayed below the 80 mark for 21 weeks – one week shy of the record in the 1990–91 recession.
