## ANZ Senior Economist, Adelaide Timbrell, commented:

ANZ-Roy Morgan Consumer Confidence fell last week ahead of the RBA July meeting. The four-week average level of confidence was the second-worst result in the last 30 years, second only to the first four weeks of the pandemic. Both 'current' and 'future financial conditions' remain persistently weak as inflation expectations hit their highest four-week average of 2023. Those paying off their own homes continue to have the lowest confidence, 6pts below the average for all survey participants.
