ANZ Senior Economist, Adelaide Timbrell, commented:

Consumer confidence improved a little last week, driven by improvements in confidence about current and future financial conditions. But confidence was still among the worst ten results since January 2020, seven of which have occurred between March and May of 2023. This highlights the impact of cost-of-living pressure and rising interest rates, despite low unemployment and an acceleration in annual wage growth to 3.7% y/y in Q1. Confidence jumped for those renting (+9.6pts), while it was down for those paying off their homes (-3.7pts) and those who own their homes outright (-1.8pts). Those paying off their homes have lower confidence than other housing cohorts.

Consumer confidence rose 1.4pts
