\*From 3 January 2022, the interviews for the consumer confidence survey have taken place Monday to Sunday. Previously they were done at the weekend (Saturday and Sunday).

## Consumer confidence: small rise

- Consumer confidence increased 1.6pts to 83.5pts. The four-week moving average rose 0.4pts to 82.8pts.
- ‘Weekly inflation expectations’ fell 0.1ppt to 5.2%, however the four-week moving average increased 0.1ppt to 5.2%.
- The financial conditions subindices both increased. ‘Current financial conditions’ (over last year) increased 5pts and ‘future financial conditions’ (next 12 months) were up 1.6pts.
- ‘Short term economic confidence’ (next 12 months) decreased 1.2pts, while ‘Medium term economic confidence’ (next five years) rose 1.0pts.
- The ‘time to buy a major household item’ subindex increased 2.1pts.

## ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last week (8–14 Apr)	Weekly change, pts	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
83.5	+1.6	82.8	110.5	5.2%

The weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,509 interviews conducted online and over the telephone during the week to Sunday.\* Not seasonally adjusted. Further data history on page 6.

## ANZ Economist, Madeline Dunk, commented:

Despite a small lift in ANZ-Roy Morgan Consumer Confidence, the series remains stubbornly weak, averaging just 83pts in 2024. While this is higher than 2023’s 78pt average, it is still 30pts off the series’ pre-COVID (1990-2019) average of 113pts.

Last week’s rise in confidence was driven by a lift in the financial conditions subindices, with current financial conditions increasing 5pts. Weekly inflation expectations took a small step down to 5.2%, although the four-week moving average rose to a three-month high.

## Consumer confidence increased 1.6pts last week
