Next release: May 2024 data

**Expected release date:** Monday 3 June 2024

### **ANZ-Indeed Australian Job Ads: plateau**

ANZ-Indeed Australian Job Ads rose 2.8% m/m in April after falling 1.0% m/m in March. In trend terms, the series was up 0.7% m/m.

ANZ

While ANZ-Indeed Job Ads has fallen 14.3% from its peak in November 2022, the series is still 36.5% higher than pre-pandemic levels.

m/m %y	/y % vs 2019	average
2.8 -6.6	6 +36.	5

ANZ Economist, Madeline Dunk: 2023's downward trend in ANZ-Indeed Job Ads has stalled in 2024, at least for now. The series has risen 3.9% since its recent trough in November last year, and the three-month moving average has been steady over the past few months.

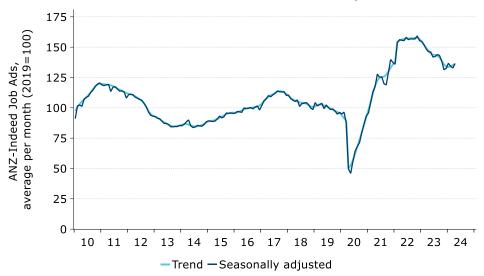

In Q1, 78% of businesses that responded to NAB's business survey reported labour was a constraint on output. While this is down from the peak of 91% in Q3 2022, it is still well above the pre-pandemic average of 42% and aligns with what ANZ-Indeed Job Ads is telling us – that supply and demand imbalances in the labour market have yet to normalise.

Indeed Senior Economist, Callam Pickering: In April, ANZ-Indeed Job Ads were pushed higher by strength in South Australia, Western Australia and Queensland, which offset a weaker result in New South Wales.

Healthcare Job Ads were a drag on national growth in April, led by nursing and physicians, but that is expected to be short-lived. This was offset in April by relatively broad-based growth elsewhere.

Job Ads are still down across most sectors over the past year, led by sizeable declines across software development, management and administration opportunities.

## Appendix

#### Data sources

The internet series counts the average number of job ads carried by each of the sites contributing to the series on the same day of each week in the month indicated. The day (which is not necessarily the same for each site) is selected by the site operator as broadly representative of its activity levels. The data are based on information provided by the operators of the following sites:

- Indeed (au.indeed.com); 2018-ongoing
- Workforce Australia, Department of Employment and Workplace Relations (workforceaustralia.gov.au) and previous iterations; 1999-ongoing
- SEEK (seek.com.au); 1999–2022
- Newspaper job ads; 1975–2018

Historical data going back to 1975 is published here.

#### Seasonal adjustment and trend

X-11 ARIMA is used for seasonal adjustment and trend estimates. New and revised original monthly data can result in revisions to the seasonal factors for historical estimates.
